

AMENDMENTS TO THE SPECIFICATION

NE Page 8 of the substitute specification, between lines 28 and 29 insert the following paragraph:

5 From Fig. 4B and the above description, it will be clear to those of ordinary skill in the art
that the flange 17 has a first flange portion comprising a first plurality of individual wires which are
crossed by the length L of the beginning 22 of the current supply wire, the length L therefore being
attached to but electrically insulated from this first plurality of individual wires. The flange 17 has
a second flange portion extending outwardly from the first flange portion, comprising a second
10 plurality of individual wires which are free from impression by crossing wires, to which the current
supply wire is not attached.
